

Softball

Instructional softball

The Instructional softball league is aimed at the development of softball fundamentals in a non-competitive environment. Instructional uses a "soft" softball, larger than the baseball used in Tee-ball. In the Instructional League, players hit pitches tossed by their own coaches. Instructional softball players are girls, ages 7-8 and generally grades 1-2. Early season will utilize a clinic style format and progress to games based on the number of players.

Minors softball

The Minors softball league is comprised of girls in grades 3 and 4, and offers further player development under structured, game conditions. Players pitch regulation softballs, batters/runners are called safe or out, and scores for games are kept. Though standings are kept, the primary focus throughout the Minors' regular season is on players' understanding of the game and development toward their own potential. A short playoff tournament follows the regular season. Some level of inter-town play may be introduced during the season.

Majors softball

The Majors softball league is comprised of players in grades 5 and 6, or any 7th grader that will be age 12 on January 1, 2008 and desires to tryout for the 12-yr old All-Stars. Players learn and develop the more advanced techniques and strategies of the game, allowing them to experience inter-town recreation level play and prepare for play at advanced levels if desired. A short playoff tournament follows the regular season.

Seniors softball

The Seniors softball program continues recreation play at an advanced level. The league is comprised of players in grades 7 and 8. All players experience inter-town play at varying levels of competitiveness. See note regarding 12-yr old 7th graders in the description for Majors.

High School Softball

The High School Softball (ages 13-15) program is a continuation of the prior levels with increasing competitiveness and opportunities to play inter-town games. Girls in 9th and 10th grade are invited to sign-up; one or more teams will be formed depending upon enrollment.
